Software Engineer with 2+ years of professional experience in Odoo ERP development (v14–v19), specializing in custom module development, third-party integrations, and end-to-end project delivery for national and international clients. Contributed to 8+ Odoo projects, including several as Technical Project Lead, from requirements analysis to production deployment. Passionate about scalable solutions, problem-solving, and Agile collaboration.

Professional Experience

Python / Odoo Development Engineer

Since Aug. 2024 Fogits - Odoo Silver Partner Sfax, Tunisia

- Contributed to 8+ Odoo implementation projects, and acted as Technical Project Lead (CPT) on selected projects, owning the scope from requirements gathering to production deployment and post-go-live support.
- Designed, developed, and maintained custom Odoo modules (v14–v19) for national and international clients (Tunisia, France, Luxembourg, Réunion Island).
- Participated in client meetings to review and test deliverables, and to validate development against business requirements.
- Led Odoo version upgrades, including code migration and functional validation.
- Managed production deployments and releases using Odoo.sh, minimizing downtime and deployment risks.
- Improved application performance through code refactoring and optimization of legacy modules.
- Leveraged functional expertise in Sales, Purchasing, Inventory, and Accounting processes to bridge technical and business requirements.
- Mentored interns and shared technical and functional best practices across the team.

Tech Stack: Odoo, Odoo.sh, Odoo AI, Python, PostgreSQL, XML, QWeb, JavaScript, OWL, SFTP, REST API, Git, GitLab, Linux.

[Engineering Internship] – BPM Solution Selection & Integration with Odoo

Feb. 2024 - May 2024 Fogits - Odoo Silver Partner Sfax, Tunisia

- Developed a connector between Bonita BPM and Odoo
- Enabled bidirectional synchronization of business processes

Tech Stack: Odoo, BonitaSoft, BPMN, REST API, Postman, Python, XML, PostgreSQL, Git, GitLab

[Technical Internship] – Customer Management Web Services

Jun. 2023 - July 2023 HTSOFT Sfax, Tunisia

- Developed a microservice for customer management using ASP.NET and C#

Tech Stack: ASP.NET, C#, Visual Studio 2022, Swagger, MySQL Query Browser, ClickUp

[Worker Internship] – Fixed-line and ADSL Subscription Supervision

July 2022 - Aug. 2022 Tunisia Telecom, UGSS Qibili, Tunisia

- Supervised fixed-line phone and ADSL subscriptions

Tech Stack: GIS (Geographic Information Systems) / Workflow Backbone

Academic Projects

- Research Lab Management Web App** – Microservice-based app with Spring Boot, Spring Cloud, Spring Data, and Angular
- Online Clothing Store Web App** – E-commerce platform using ASP.NET and C#
- Smart Greenhouse Management System with Blockchain** – Data storage on embedded device, blockchain solution developed in PHP

Education

Engineering Degree - Computer Science and Applied Mathematics
